

Python Crash Course

Python for Finance

- Before we get started, let's have a quick review of how to work with Python.
- Keep in mind this is not meant to be a complete comprehensive review of Python, instead it is meant to be a quick overview of how to use Python.

Python for Finance

- We will be using the Jupyter Notebook environment for the majority of the course, but please feel free to use any IDE you prefer for Python!

Python for Finance

- After this quick crash course you will have an exercise notebook with a few tasks for you to go through.
- After that we will go through the solutions notebook.

Let's get started!

Python Crash Course

Python for Finance

- We will be covering the following topics
 - Fundamental Data Types
 - Comparison and Logical Operators
 - Control Flow Statements
 - Functions
 - Built-in Python Expressions
